06/2023 – 10/2023 Ashgabat, Turkmenistan

### WEB APP DEVELOPER BARS CONFECTIONARY

---

*Work in progress project.* Current website was not meeting Bars' or their potential customers needs.

Responsibilities:

- Analyzing user requirements: Understanding the needs and requirements of the web app's target audience, including their preferences and behaviors.
- Redesigning the user interface: Creating wireframes and mockups of the web app's user interface (UI) and user experience (UX), including layout, color schemes, and functionality.

- Developing the new web app: Writing code for the web app's features and functionality, including front-end(AstroJS) and back-end(Directus) development, and ensuring that it is compatible with different web browsers and devices.
- Testing the web app: Conducting testing to ensure that the web app functions as intended, and identifying and resolving any bugs or issues.
- Optimizing the web app: Ensuring that the web app is optimized for performance, speed, and responsiveness, and minimizing its impact on device battery life and data usage.
- Deploying the web app: Preparing the web app for deployment to a web server or cloud-based platform, including configuring the necessary server settings and database connections.
- Maintaining the web app: Monitoring the web app's performance, identifying and resolving any issues that arise, and releasing updates and new features as needed.
